1. PURPOSE

1.1 Objective

Provide guidance to the Director of Station Emergency Operations for emergency response actions during an emergency event. These actions include the following which cannot be delegated:

CR DSEO →

- Event classification (The ADTS relieves the CR DSEO of this responsibility)
- Initiation of station emergency response
- Initiation of on-site personnel protective actions

CR DSEO and EOF DSEO →

- Authorization of mitigation and repair activities
- ~~Authorization of emergency exposure upgrades~~ | chg 1
- Command and control of station emergency response
- Approval of off-site Protective Action Recommendations (PARs)
- Approval of on-site evacuation
- Authorization of emergency exposure upgrades > 25 Rem T/DF for life saving actions | chg 1
- Authorization of off-site notifications

1.2 Discussion

Partial SERO activation is initiated upon declaration of an Unusual Event, Posture Code Delta-One or Delta-Two. The Shift Manager of the affected unit becomes the CR DSEO and activates the on-shift staff only.

This procedure describes the actions of the affected unit Shift Manager/CR DSEO, Station Duty Officer, and EOF DSEO when an emergency event has been declared. It also provides guidance to the EOF DSEO for emergency event de-escalation, termination, and recovery operations.

The Station Duty Officer reports to the affected unit control room and assists the Shift Manager/CR DSEO, as directed, in carrying out delegated duties. The EOF DSEO reports to the Emergency Operations Facility.
