Subject: Re: FRN FOR A NEW SFC LAICENSE AMENDMENT

stu does want to review fed reg notices. we have no legal objection to this notices assuming you clarify the text as we discussed and we make sure the documents are publically available before it is issued.

>>> James Shepherd 01/10 2:27 PM >>>

Friday is my CWS day, so I would like to have it in time to pass on the cAmper by COB Thurs, if possible.

thanks
jim

ps how does this fit with the new policy of limited OGC support for routine actions? (Like maybe you don't really need to review it?)

>>> James Lieberman 10-01-2000 11:59:18 >>>

e mail will be fine, when do you need the response by?

>>> James Shepherd 01/10 11:07 AM >>>

Jim,

Attached is a FRN for a SFC amendment request to remove license conditions no longer needed because the have completed UF6 cylinder washing. Normally we would not do a FRN for this because it is essentially administrative in nature, but Nelson thinks it is a good idea because of the existing hearing on decommissioning. If it's OK with you, we can do the concurrence by e-mail.

thanks
jim

Lieberman's check on 'publically available'
is ADAMS. Both the SFC request and our
acceptance review letter are in there as of 11 Jan.
