Subject: radioactive waste recycling

'00 JAN 24 A9:04

I am writing as a concerned citizen about the possibilities of nuclear waste being recycled into the market place. I urge you to not let this happen as this will cause much more problems than it might appear to solve. Nuclear weapons and waste must be isolated from the public market place, these things should not be introduced into the recycling systems of our country. All nuclear waste which has been released should be re captured and an end must be put to a system which generates waste which we cannot handle.

A concerned citizen
