1RF07 CONTAINMENT INSERVICE INSPECTION SUMMARY REPORT FIRST INTERVAL, FIRST PERIOD, FIRST OUTAGE

1.0 INTRODUCTION

1.1 PURPOSE

The purpose of this summary report is to provide information relating to the containment inservice inspection (CISI) activities performed during the seventh refueling outage at the Comanche Peak Steam Electric Station (CPSES) Unit 1. This report documents compliance with 10CFR50.55(a) and ASME Section XI, 1992 Edition, '92 Addenda for all examinations and tests.

1.2 SCOPE

This summary report addresses those examinations of CPSES Unit 1 containment systems as stipulated in the CPSES Containment ISI Program Plan, Rev. 0 (the Plan). The Form NIS-1 is included in Appendix A. A list of the Form NIS-2's documenting Code Repairs/Replacement activities (if any) that have occurred since the previous Form NIS-1 (issued for 1RF06 Code Class 1, 2 and 3 inservice inspection activities) is contained in Appendix D. The period of time covered is from August 1998 to December 1999.

1.3 OUTAGE, PERIOD AND INTERVAL START AND END DATES

This refueling outage was the First Outage in the First Inspection Period of the First Inservice Inspection Interval. The CISI examinations for this outage were performed between September 15, 1999 and October 29, 1999. The Inspection Period began September 9, 1996 and will end by September 9, 2001 (per 10CFR50.55(a)). The Inservice Inspection Interval began September 9, 1996 and is scheduled to end by September 9, 2008 (or approximately seven years after the completion of the first period).

1.4 AUTHORIZED NUCLEAR INSERVICE INSPECTOR

Tests, examinations, repairs and/or replacements were witnessed or verified by Mr. Joe C. Hair, Authorized Nuclear Inservice Inspectors for Hartford Steam Boiler Inspection & Insurance Company as indicated by signature on the examination data sheets. Hartford Regional Office is located at 15415 Katy Freeway, Suite 300, Houston, Texas.

2.0 SUMMARY OF EXAMINATIONS AND EVALUATIONS

2.1 Metal Containment

Examinations are conducted utilizing visual and or volumetric techniques in accordance with the requirements of the Code. Where a particular examination requirement of the Code is determined to be impractical, a request for relief from the requirement is submitted in accordance with the provisions of 10CFR50.55a(g)(6)(i). Refer to Appendix B for a summary of examinations performed during this outage. The relief request number is identified in the remarks of the summary for each examination area requiring relief. Relief Requests generated during this outage, if any, are contained in Appendix C.

a. <u>Visual Examinations</u>

164 Visual examinations of metal containment components were completed. There were no conditions identified that adversely affected the ability of metal containment system to perform its intended function.

b. <u>Volumetric Examinations</u>

No ultrasonic examinations were performed.

c. <u>Evaluations of Inaccessible Areas</u>

There were no conditions identified in accessible areas that indicated the presence of, or that resulted in, degradation to any inaccessible areas.

2.2 CONCRETE CONTAINMENT

There were no concrete containment examinations performed during the period covered by this report.

13. Abstract of Examinations and Tests. Include a list of examinations and tests and a statement concerning status of work required for the Inspection Plan.

Reference CPSES Unit 1 Containment Inservice Inspection Summary Report for the first interval, first period, first outage. All required examinations have been completed.

14. Abstract of Results of Examinations and Tests.

Reference CPSES Unit 1 Containment Inservice Inspection Summary Report for the first interval, first period, first outage.

15. Abstract of Corrective Measures.

Reference CPSES Unit 1 Containment Inservice Inspection Summary Report for the first interval, first period, first outage.

We certify that a) the statements made in this report are correct, b) the examinations and tests meet the Inspection Plan as required by the ASME Code, Section XI, and c) corrective measures taken conform to the rules of the ASME Code, Section XI.
