

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

February 1, 2000

OFFICE OF THE
SECRETARY

J. Bond
19 Widgeon Lane
Sag Harbor, NY 11963

RE: Millstone Nuclear Power Station, Unit 3
Docket No. 50-423-LA-3

Dear J. Bond:

Thank you for your letter sent to Commissioner Dicus concerning the application for a License amendment for operations at the Millstone Nuclear Power Station. As your letter notes, there is a proceeding in progress on this amendment request before an Atomic Safety and Licensing Board. In such proceedings, the Commission has an appellate role. Because of that role, the Commission cannot respond to your request. Your request and a copy of this response, however, will be placed in Agency records on the Millstone plant. A copy will also be sent to the Nuclear Regulatory Commission staff with regulatory responsibility for plant operations.

Sincerely,

Emile L. Julian
Assistant for Rulemakings
and Adjudications
