ALB

DOCKET NUMBER  
PROPOSED RULE **PR 20**  
(64FR35090)

Nuclear Regulatory Commission:

Hello. Can you please mail me a current map of the location sites of all the Nuclear Power Plants in the U.S.A., including active or non-active sites? I had an old map that I got from a college book sale, but would prefer a current revised map.

Would it be possible to send me a booklet describing the current process being used for disposal or reprocessing of Nuclear Waste?

Also, can you please explain to me: Why is that we are using radio-active waste matter to produce pots and pans, silverware, and other household items. This seems extremely inconsiderate and unsafe for the citizens to be exposed to - no matter what the level of radiation being emitted is, even remotely?

Your help is appreciated. Thank you for taking the time to respond back.

Sincerely,

Mrs. Hughes

P.S. Please let me know the correct office to write to for any questions you can not answer or any information requested.
