'00 FEB -3 AM 125

Attn: Ms. Elizabeth A. Hayden

OFFICE OF
REGULATORY
ADMINISTRATION

Dear Ms. Hayden:

We have become aware of the blending of nuclear waste with scrap metals. (From nuclear processing plants being torn down and salvaged) We are told that this material would find it's way into household items...including belt buckles, baby carriages, bed springs, etc. We find this disgusting to say the least, to expose the general public to radiation, beyond that which we are already exposed to.

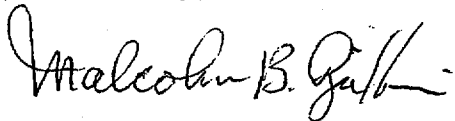

We demand the following:

- (1) Keep radio active wastes from the public and environment.
- (2) Prohibit radioactive materials from entering the consumer marketplace,
- (3) That all that's been released be re-captured and
- (4) work for an International Prohibition on radio active "release".

This matter, we feel strongly, should receive your personal attention because it is affecting our (and your) children, grandchildren and the many generations to come.

Was it Chief Seattle who said, "We must consider and protect seven future generations."?

Sincerely,

Malcolm B. Griffin
