SUBJECT: Revision 1 to NEI 95-10, "Industry Guideline For Implementing The Requirements of 10 CFR Part 54 – The License Renewal Rule"

PROJECT NUMBER: ~~690~~

689

Dear Mr. Grimes:

NEI has revised NEI 95-10, "Industry Guideline For Implementing The Requirements of 10 CFR Part 54 – The License Renewal Rule" to incorporate guidance for preparing the standard license renewal application. Revision 1 also reflects a number of agreements reached between the industry and the NRC staff regarding the active/passive status of certain components.

Two copies of NEI 95-10, Revision 1 are enclosed for your information. One enclosure is a line-in, line-out version to show the changes we made. The other enclosure is a clean version incorporating all the modification.

Pursuant to the schedule for issuance of the Generic Aging Lessons Learned (GALL) Report and Standard Review Plan for License Renewal, we will submit NEI 95-10, Revision 2 in June of this year to NRC for endorsement. In addition to the changes included in Revision 1, Revision 2 will incorporate lessons learned from the review of the Calvert Cliffs and Oconee applications as well as relevant information from the GALL report.

We are available to discuss any comments on the enclosed document.

Sincerely,

Douglas J. Walters
