Dear Chairman Meserve:

I am calling on the Nuclear Regulatory Commission to stop the recycling of radioactive waste into products and to isolate these materials. The public must not be exposed to any radioactive materials or products contaminated from radioactive exposure.

Using radioactive waste in consumer products poses unnecessary, avoidable and involuntary risks that consumers, producers, and the raw materials industries don't want. Any consumer products that do contain radioactive waste must be labeled so consumers can make knowledgeable decisions. Without labeling, freedom is compromised.

The NRC should extend the comment period on its proposal to release radioactive waste into the marketplace until September 2000. This issue is too important to act hastily upon and it should be fully debated by the public.

Sincerely,
Lawrence Paser
