MS GLORIA BENNINGTON, Spent Fuel Project
US Nuclear Regulatory Commission
Ms Owfn 6 F 18 Room 0 6 C 10
Washington DC 20555

Dear Ms. Bennington:

RSB LOGISTIC in North America is making strategic changes to provide all our business partners with greater access to transportation expertise and services.

I am pleased to inform you that effective July 18, 1999, the RSB LOGISTIC office in St. Louis, Missouri, will be relocated to Paducah, Kentucky. This decision is reflective of our current level of business in the Paducah region and our intention to further expand our activities there. We believe the move will allow RSB LOGISTIC IN NORTH AMERICA to build on our competitive position.

George Yates to head new office.

Mr. George Yates has been selected to lead the Paducah operation. As a veteran of the nuclear industry, Mr. Yates is both well-known and well-suited to meet the needs of the local nuclear fuel industry. He will focus on providing additional services and liaison to our business partners in the local area as well as supporting our business partners throughout North America with road transport services.

The new Paducah location will provide added-value services including specialized fleet and equipment based in both the Paducah/Metropolis area, and the Oak Ridge area of Tennessee.

RSB Head Office will become a comprehensive source for the North American nuclear transportation management services.

I would also like to inform you that we are combining our US and Canadian nuclear transportation management groups into one central location, our Head Office in Saskatoon, Saskatchewan.

This move will allow RSB to provide a central source for integrated expertise in the overseas transportation of radioactive materials. We have several on-hand experts in international regulations; global expertise in radioactive materials transportation, packaging and handling; dangerous goods training; as well as import and export licencing.

To ensure continuity in our service, Sally Roberts, Manager of the US Nuclear Transportation Management Division will relocate to Saskatoon during the transition phase and be available to serve our business partners as in the past.

To assist you in contacting personnel in our organization, we have enclosed a directory of our North American locations. If you have any questions regarding the transition, please contact our Head Office at (306) 242-8300, or toll-free 1-800-667-3934. You may ask for me, or for our Quality Assurance Manager, Jane Mason.

Sincerely,

DONNA GOERTZEN
President
