[Message]

Dear Mr. President, I was horrified to read in "The Atlanta Constitution" that the NRC and DOE are planing to release radioactively contaminated materials to be re-cycled into products used by the general population. By the NRC's own calculations, exposure to these materials "over a lifetime, could cause fatal cancer in four in 10,000 people." They do not mention how many non-fatal cases of cancer will be caused by exposure, or the fact that our children will be the most vulnerable victims. How can government agencies that are supposed to protect us be allowed to piosion us? Please do what you can to prevent this from happening. We do not need foreign enemies, we are managing our own destruction without any help.
