Washington, DC 20555-0001

**Subject: Beaver Valley Power Station, Unit No. 2**  
**Docket No. 50-412, License No. NPF-73**  
**Revised Information to Support License Amendment Request No. 127**  
**Westinghouse Proprietary Information**

This letter provides a copy of the revised Westinghouse Electric Corporation report "Low Temperature Overpressure Protection System Setpoint Review for Beaver Valley Unit 2 15 EFY Heatup and Cooldown Curves." The proprietary Westinghouse report is required to support License Amendment Request (LAR) 127 submitted by letter L-99-080, dated June 17, 1999, and currently under NRC review. LAR 127 proposed modifications to the heatup, cooldown and overpressure protection curves in the technical specifications for Unit 2. As this letter provides the latest revision of the Westinghouse report, it is requested that the previous versions of this report (both proprietary and non proprietary) originally submitted with LAR 127 be withdrawn from the docket and NRC review.

The revised Westinghouse report is provided at the request of the NRC. The revision is necessary because proprietary information in the Westinghouse report originally supplied with that LAR was not correctly identified. In order to appropriately identify the proprietary information contained within the report, Westinghouse has issued a revision to the report. The revised proprietary (Class 2C) and non proprietary (Class 3) versions of this report with the associated Proprietary Information Notice, Copyright Notice, and a Westinghouse application for withholding proprietary information are contained in Attachment A. The revision of this report also contains some minor clarifications, additional descriptive material and editorial changes (marked by revision bars) that do not affect the technical conclusions of the report. The changes to the report are summarized in Attachment B.

As the Class 2C version of the Westinghouse report contains information proprietary to Westinghouse, it is supported by an affidavit signed by Westinghouse, the owner of the information. This affidavit sets forth the basis on which the information may be withheld

AP01

from public disclosure by the Commission and addresses with specificity the considerations listed in paragraph (b) (4) of section 2.790 of the Commission's regulations. Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's regulations.

If there are any questions concerning this matter, please contact Mr. Mark S. Ackerman, Manager, Licensing at 412-393-5203.

Sincerely,

Lew W. Myers

Class 2C Report - "Low Temperature Overpressure Protection System Setpoint Review For Beaver Valley Unit 2 15 EFPY Heatup And Cooldown Curves," Revision 1

Class 3 Report - "Low Temperature Overpressure Protection System Setpoint Review For Beaver Valley Unit 2 15 EFPY Heatup And Cooldown Curves," Revision 1

## **PROPRIETARY INFORMATION NOTICE**

Transmitted herewith are proprietary and/or non-proprietary versions of documents furnished to the NRC in connection with requests for generic and/or plant-specific review and approval.

In order to conform to the requirements of 10 CFR 2.790 of the Commission's regulations concerning the protection of proprietary information so submitted to the NRC, the information which is proprietary in the proprietary versions is contained within brackets, and where the proprietary information has been deleted in the non-proprietary versions, only the brackets remain (the information that was contained within the brackets in the proprietary versions having been deleted). The justification for claiming the information so designated as proprietary is indicated in both versions by means of lower case letters (a) through (f) contained within parentheses located as a superscript immediately following the brackets enclosing each item of information being identified as proprietary or in the margin opposite such information. These lower case letters refer to the types of information Westinghouse customarily holds in confidence identified in Sections (4)(ii)(a) through (4)(ii)(f) of the affidavit accompanying this transmittal pursuant to 10 CFR 2.790(b)(1).

## **COPYRIGHT NOTICE**

The reports transmitted herewith each bear a Westinghouse copyright notice. The NRC is permitted to make the number of copies of the information contained in these reports which are necessary for its internal use in connection with generic and plant-specific reviews and approvals as well as the issuance, denial, amendment, transfer, renewal, modification, suspension, revocation, or violation of a license, permit, order, or regulation subject to the requirements of 10 CFR 2.790 regarding restrictions on public disclosure to the extent such information has been identified as proprietary by Westinghouse, copyright protection notwithstanding. With respect to the non-proprietary versions of these reports, the NRC is permitted to make the number of copies beyond those necessary for its internal use which are necessary in order to have one copy available for public viewing in the appropriate docket files in the public document room in Washington, DC and in local public document rooms as may be required by NRC regulations if the number of copies submitted is insufficient for this purpose. Copies made by the NRC must include the copyright notice in all instances and the proprietary notice if the original was identified as proprietary.
