

Allied Technology Group
ATTN: Mr. Mike McCauley
1556 Bear Creek Road
Kingston, TN 37763

SUBJECT: ASSIGNMENT OF REPORTING IDENTIFICATION SYMBOL

Dear Mr. McCauley:

This letter is in response to your February 15, 2000 telephone conversation with Patricia Tana of my staff regarding reporting to the NMMSS. The symbol XWE has been assigned as the Reporting Identification Symbol (RIS) for reporting activities involving source and/or special nuclear material, as applicable, under Tennessee State License #R-73020-K00. This RIS is to be used only for **UNCLASSIFIED** transactions involving material at Allied Technology Group in Tennessee.

The Nuclear Regulatory Commission has specified, in Sections 75.34, 74.15, 74.13, 70.54 and 40.64 of 10 CFR Parts 75, 74, 70 and 40, and in associated reporting instructions, requirements for submittal to the NRC of material transfer reports whenever certain transfers of special nuclear or source material occur. Reports are required for any transfer, receipt or inventory change of 1 gram or more of contained U-233, U-235 or Pu in special nuclear material, 1 kilogram or more uranium or thorium of foreign origin in source material, or the import of 1 kilogram or more of uranium or thorium of any origin.

The NRC utilizes an electronic data processing system to record these reports. All licensees subject to these reporting requirements have been assigned an RIS for identification. The RIS for the facility receiving nuclear material from or shipping nuclear material to your facility should be used in completing the transfer forms (DOE/NRC-741) in accordance with the instructions, and should be used in inventory reports and other correspondence with the NRC relative to such reports.

Sincerely,

Lidia Roché, Section Chief
International Safeguards Section
Licensing and International Safeguards
Branch, FCSS, NMSS

cc: T. Headley, NAC
