February 16, 2000

OFFICE OF THE
RULEMAKING
ADJUTANT GENERAL

Mr. Richard Meserve, Chair
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Meserve:

I write about materials contaminated by radioactivity. While there may be certain distinctions to be made, it seems to me that, considering the danger to human life and health from any contact with radioactive materials, you should act to prevent any "recycling" or "reuse" of any such materials by any company or organization. Such materials should not be on the market.

You and your commission owe us this protection.

Very truly yours,

Jean Christie
