OFFICE OF THE
GENERAL COUNSEL
ADVISOR

Dear Chairman Meserve,

I demand that no radioactive con-
taminated materials ever enter the consumer
market place.

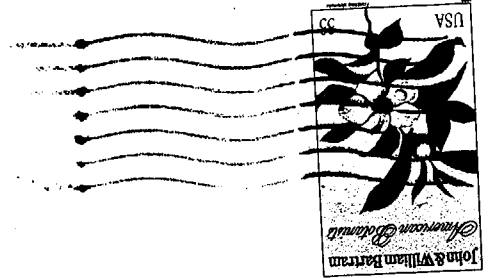

"0" TOLERANCE

I don't care whether it is core or surface
or whatever. Nothing should enter the market place.

As far as I am concerned, we shouldn't
even be using nuclear power until or unless
we have developed a way to decontaminate
the by products.
