

February 29, 2000

MEMORANDUM TO: A. Randolph Blough, Director, DRP, RI
Wayne D. Lanning, Director, DRS, RI
Loren R. Plisco, Director, DRP, RII
Charles A. Casto, Director, DRS, RII
Geoffrey E. Grant, Director, DRP, RIII
Kenneth E. Brockman, Director, DRP, RIV
Arthur T. Howell, Director, DRS, RIV

FROM: John A. Grobe, Director, Division of Reactor Safety, RIII */RA/*

SUBJECT: D. C. COOK INSPECTION SUPPORT

I would like to thank each of you who provided support to Region III through the sharing of inspection resources for our restart oversight effort at D. C. Cook. Each of the inspectors that provided support to us was highly competent and displayed a high level of professionalism during the inspections. Some of these inspections created a hardship for the inspectors personally and we appreciate the sacrifices they made around the holiday season. So far, our inspection efforts have been very successful.

D. C. Cook is currently scheduled to restart approximately April 20, 2000. It is possible that this date will slip somewhat. One of the more significant inspections remaining to be accomplished is the Restart Readiness Assessment Team Inspection including final assessment of operations to support restart and closeout of any remaining issues. Several of you have scheduled inspectors to support that inspection. However, due to the necessity of that inspection to track restart, the dates of the inspection may change from those currently identified. We are already aware that this will impact the availability of some of the inspectors identified to support the inspection. Therefore, we may be looking for additional Resident Inspector and Engineering Inspector support. If you have an appropriate inspector available that may be able to support this inspection during the April - May, 2000 time frame, please contact Gary Shear of my staff to provide the names and available dates. Gary can be reached at (630) 829-9876 or GLS. Also,

CONTACT: Gary L. Shear
(630) 829-9876

if you or your staff have any questions regarding this inspection, do not hesitate to contact either Gary or myself. Again, I want to thank you for your support and continued consideration for inspection resources.
