

September 8, 1999

The Honorable Joe L. Barton, Chairman
Subcommittee on Energy and Power
Committee on Commerce
United States House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

The U.S. Nuclear Regulatory Commission (NRC) intends to publish a final rule in the Federal Register that will amend the "List of approved spent fuel storage casks" (10 CFR 72.214). NRC is approving the Holtec International HI-STAR 100 cask system for storage of spent fuel under the conditions specified in the Certificate of Compliance (CoC). This cask, when used in accordance with the conditions specified in the CoC and NRC regulations, will meet the requirements of 10 CFR Part 72; thus, adequate protection of the public health and safety would be ensured. This cask is being listed under 10 CFR 72.214, "List of approved spent fuel storage casks" to allow holders of power reactor operating licenses to store spent fuel in this cask system, under a general license. Further, the NRC has approved a complementary application of this cask system for use in transporting spent fuel under 10 CFR Part 71. The CoC will terminate 20 years after the effective date of the final rule listing the cask in 10 CFR 72.214, unless the cask's CoC is renewed. The certificate contains conditions for use specific for this cask, addressing issues such as operating procedures, training, and spent fuel specification.

Sincerely,
/s/ Dennis K. Rathbun
Dennis K. Rathbun, Director
Office of Congressional Affairs
