Dear Jack Parratt, Proj. Scientist

Please dig up, package & store
Nuclear Waste, at Elletts Valley, NY.
Exhumation of these burial grounds are
a must. It would provide more jobs;
also the costs to guard the site for a
long period of time would be much
more costly.

- * Institutional Control would be very
expensive & depends on future funding.
 - * The high level waste left in the tanks
should not be reclassified as incidental
waste.
 - * The proposed doses, in case institutional
control fails should be more protective.
 - * Calculations of potential doses must
include exposure from the entire site
including both burial grounds.
- Exhumation of the burial grounds
is a must.

Dennis Dick
