*Left Side - Record of test results that would have been Positive at the NRC cutoff level.

Right Side - Record of MRO confirmed positives based on Union Electric's more stringent cutoff level.

Initiatives Taken:

A review of the testing panel was conducted. The review found only one (1) MRO positive for barbiturates and benzodiazepines since program implementation in January 1990. Because of this low incidence these two drug categories were deleted from the testing panel.

Reportable Fitness For Duty Events Under 10CFR26.73:

There were no reportable Fitness For Duty events during this reporting period; however, the DHHS Laboratory reported two (2) specimens as adulterated. Information regarding this issue was previously communicated to the Region IV NRC Staff.
