SUBJECT: AP600 REVIEW FEES

Dear Mr. Wilson:

The AP600 Design Certification was issued on December 23, 1999. That event should conclude activities supporting the AP600 Design Certification review, and we expect that the fee invoice for the first quarter of fiscal year 2000 will be the last we receive. If there are any activities that are incurring fees that will be billed to the AP600 TAC, they should be terminated.

We have no plans to update the AP600 Standard Safety Analysis Report. The AP600 design described in the 12/99 AP600 Design Control Document is the design that should be referenced in the AP600 Final Design Approval.

Please contact me if you have any questions concerning this subject.

Very truly yours,

B. A. McIntyre, Manager
Advanced Plant Safety and Licensing
