Mr. Michael D. Wadley, President
NSP Nuclear Generation
Northern States Power Company
414 Nicollet Mall
Minneapolis, MN 55401

SUBJECT: MONTICELLO NUCLEAR GENERATING PLANT - CORRECTION TO SAFETY
EVALUATION FOR AMENDMENT 109 (TAC NO. MA7355)

Dear Mr. Wadley:

On February 16, 2000, the Commission issued Amendment No. 109 to Facility Operating License No. DPR-22 for the Monticello Nuclear Generating Plant. The amendment revises the Technical Specification (TS) Safety Limit Minimum Critical Power Ratio (SLMCPR) values for two recirculation pump and single-loop operation, deletes cycle specific-footnotes, updates the single-loop operation Average Planar Heat Generation rate limiting values, corrects a typographical error, and deletes an obsolete reference to Siemens fuel.

A typographical error was inadvertently made in the last paragraph of Section 1.0, "Introduction," of the Safety Evaluation accompanying the Amendment. The list of fuel assemblies for the Monticello Cycle 20 core should include "140 twice-burned GE11 bundles," instead of "104 twice-burned GE11 bundles."

If you have any questions, please call me at (301) 415-2296.

Sincerely,

/RA/

Carl F. Lyon, Project Manager, Section 1
Project Directorate III
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket No. 50-263
