***Coalition Of Elected Officials Within 10-Mile Radius Of Con Edison's  
Indian Point 2 Nuclear Plant, Buchanan, N.Y.***

March 9, 2000

Chairman Richard A. Meserve  
Commissioner Nils J. Diaz  
Commissioner Greta J. Dicus  
Commissioner Edward McGaffigan, Jr.  
Commissioner Jeffrey S. Merrifield  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

Dear Chairman Meserve and Commissioners:

We, the elected officials who represent those within a ten mile radius of Con Edison's Indian Point 2 nuclear plant in Buchanan, demand that the utility replace its steam generators now in the wake of the February 15 radioactive leak. We call on the Nuclear Regulatory Commission to take whatever action it can to achieve this result.

Nearby Indian Point 3 operated by the New York Power Authority replaced its same Westinghouse manufactured steam generators in 1989 at a cost of \$110 million. Meanwhile, Con Ed's equipment continues to operate over these past 25 years as the oldest Westinghouse generators of the kind in the country.

We who live in the area are concerned about our health and safety. Repeated servicing of these aging generators has not prevented a significant level 2 radioactive leak from occurring. We believe that the answer is to stop fixing and start installing the new generators that are already on site.

Sincerely,

***The Coalition Of Elected Officials Within A 10-Mile Radius Of Con Edison's Indian  
Point 2 Nuclear Plant In Buchanan, New York.***

Dear Sandy:

I regret that I am unable to join you at the News Conference on Thursday, March 9 at Indian Point. However, I join you in spirit and applaud you for drawing attention to the need to take action to ensure that the Con Ed plant is safe. The recent small incident should serve as a warning to alert everyone concerned about the dangers of a potential mishap. It behooves all responsible parties to take this warning seriously and act to make whatever corrections are indicated, to modernize the plant.

Sincerely,

Marion S. Sinek
