Subject: NRC Review of Topical Report CE NPSD-1041

Reference: D. F. Pilmer to U.S. NRC, "CE Owners Group Submittal of CE NPSD-1041, Joint Applications Report for High Pressure Safety Injection System Technical Specification Modifications, March 1998, letter CEOG-98-117, dated March 11, 1998.

By means of the Reference letter, the Combustion Engineering Owners Group (CEOG) submitted Topical Report CE NPSD-1041 for staff review. Subsequent phone discussions with the staff on 1/18/00 have identified the need to revise information before the review of this topical can be completed.

Since the revised information will require some time to prepare, this letter is to request that the review of Topical Report CE NPSD-1041 be temporarily suspended and TAC MA1555 be closed. The CEOG will advise the staff of planned changes to the topical and a firm date for re-submittal. Current plans are to incorporate updated information and submit Rev 01 of this non-proprietary topical report by mid-April 2000.

If you have any questions, please contact me.

Very truly yours,

Ralph Phelps, Chairman
CE Owners Group
