1999 ANNUAL REPORT

OCCUPATIONAL EXPOSURE

1999 Occupational Radiation Exposure

The attached table summarizes personnel radiation exposure by job function, work group, and employer for the year 1999. The methodology and format used to prepare the table meets the reporting requirements of Section 6.6.1 of the Palisades Plant Technical Specifications.

Occupational exposures, derived from Electronic Dosimeter (ED) data, are adjusted by a factor that corrects the ED data to the dose for each individual as measured by thermoluminescent dosimeter, the legal record dose. The correction factor is applied to each job function, work group and employer category on the attached table.

The Special Maintenance activities conducted during 1999 included the following:

- Radwaste packaging activities
- Sluice resins from Tank-51A and Tank-55C to Tank-100
- Prepare liners, High Integrity Containers and boxes for shipment
- Transfer Tri-Nuk filters from fuel pool
- Transfer incores from storage cask to shipment liner
- Dry Fuel Storage (DFS) minor work
- Place/Remove Multiassembly Sealed Basket (MSB) from pool, drain and test
- Transfer MSB to Ventilated Concrete Cask and Transport Ventilated Storage Cask to Independent Spent Fuel Storage Installation
- Welding and NDT of MSB numbers 15 through 19
- DFS decon activities
- Operations activities in support of DFS
- 1999 DFS dry run activities
