Subject: recycling of radiation-exposed materials outrageous

00 MAR 15 05:12

i have just learned that the DOE is subsidizing the recycling of radioactively contaminated scrap metal, selling it for use in cars, cookware, and other items.

this is outrageous!!!! this is NOT acceptable!!! This kind of action should be considered criminal! This must stop immediately!! And do not think we ordinary folk think for one NY minute that this is SAFE.

Stop this criminal behavior!!!

sincerely
shelley samet
