REC'D BY  
Mr. Meserve,

20 MAR 00 08:52

As a long time activist with the Sierra Club, I am totally against recycling of nuclear waste. You are responsible for letting the public know about any radioactive substances such as this program. The public comment period should be extended until September, 2000. As usual, I feel that our government agencies are putting cost before public health.

Sincerely,  
Charlene Hoag
