DUCKET NUMBER  
PROPOSED RULE **PR** 20  
(64FR35090)

Nuclear Regulatory Commission  
11555 Rockville Pike  
Rockville, MD 20852

Dear Madam or Sir;

I am writing to express my concern over an article I read in The Amicus Journal about radioactive scrap metal from a former nuclear weapons plant being recycled into household products - and subsidized by the Department of Energy.

I understand the Commission is trying to establish standards that would set allowable radiation levels for recycled radioactive waste. Given the toxicity of even low-level radiation, I urge you to rethink this whole idea of even recycling radioactive waste in the first place.

Thank you for your time.

*Lynn Forrest*
