DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

DATE
MAR 23 P3:30

OFFICE
ADDRESS

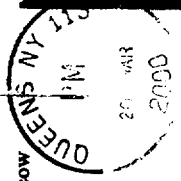

March 18, 2000

Dear Sir,
We are totally opposed to the recycling of radioactive contaminated scrap metal from former nuclear weapons plants - especially for use in cookware, medical devices and children's toys as well as car parts. I believe this material to be toxic even in low levels and added to all the other radioactive materials we are exposed to ie, x-rays, mammograms, etc etc. is downright dang'rous to all of us. This material is a filter, all cumulative. I hope you will re-consider doing this.
Sincerely,
Barbara Moscow
