Ladies/Gentlemen:

DOCKETS 50-266 AND 50-301
SECURITY ORGANIZATION CHANGES
POINT BEACH NUCLEAR PLANT UNITS 1 AND 2

This letter notifies you of changes that have recently taken place associated in Point Beach Nuclear Plant (PBNP) Security organization. Coincident with NRC approval to transfer the PBNP Operating Licenses, DPR-24 and DPR-27, to the Nuclear Management Company, there will be additional changes made to the organizational structure of the Security Group. Commission approval of our application to transfer the Operating Licenses is anticipated within the next two months.

Effective January 24, 2000, the position of Manager-Emergency Response was eliminated. The PBNP Security Supervisor now reports directly to the Manager, Regulatory Services & Licensing. This change results in the elimination of one layer of management between the Security Supervisor and the Site Vice President, who has overall responsibility and authority of the PBNP security program.

Effective March 1, 2000, a number of site-wide managerial roles were redefined. The title for the Manager, Regulatory Services & Licensing was changed to Site Services & Assessment Manager. The Manager's role in relation to the PBNP security program remains the same.

As noted above, we anticipate additional changes to our Security organization following transfer of our Operating Licenses to the Nuclear Management Company. Following approval of license transfer, we will submit PBNP Security Plan changes in accordance with the requirements contained in 10 CFR 50.54(p).

Sincerely,

A.J. Cayia
Site Services & Assessment Manager
