Office or Director of Use of Scrap Radio-
-active Materials
Nuclear Regulatory Commission
Rockville, MD

Dear Nuclear Waste Police Persons,

How does the Department of Energy come by the authority... get the OK to... have the non-caring audacity to subsidize the recycling of thousands of tons of radioactively contaminated scrap metal that comes from a former nuclear weapons plant in Oak Ridge, TN? For two years the DOE has been paying an outfit, firm, organization known as BNFL to recycle & sell this hot garbage. The eventual usage? Auto parts, cookware - COOKWARE! medical devices & even children's toys - CHILDREN'S TOYS!

I am appalled. I am dismayed. I am totally disgusted and I AM ANGRY! Have Washington bureaucrats lost their minds? from disgusted Don Williams
