

March 30, 2000

Mr. T. F. Plunkett
President - Nuclear Division
Florida Power and Light Company
P.O. Box 14000
Juno Beach, Florida 33408-0420

SUBJECT: ST. LUCIE PLANT, UNITS 1 AND 2, CORRECTION OF AMENDMENTS
NOS. 164 AND 106 REGARDING ALLOWED OUTAGE TIME
(TAC NOS. MA7476 AND MA7477)

Dear Mr. Plunkett:

On February 15, 2000, the U.S. Nuclear Regulatory Commission (NRC) issued Amendments Nos. 164 and 106 to Facility Operating Licenses Nos. DPR-67 and NPF-16 for the St. Lucie Nuclear Plant, Unit Nos. 1 and 2. The amendments were for the low pressure safety injection system allowed outage time extension. In those amendments, an implementation period of 30 days was inadvertently cited by the NRC. The NRC staff did not provide a 60-day implementation period from the date of receipt as requested by e-mail correspondence dated November 30, 1999, and referenced in a letter from Florida Power and Light Company dated February 21, 2000. The 60-day implementation period was needed to complete the procedure development and training associated with the implementation of the configuration risk management program that was required by the amendments. This error was introduced during a transition between licensing project managers that occurred on December 1, 1999, before the amendment was issued.

Each page 2 to License Amendments Nos. 164 and 106 have been corrected to include this change. Copies of these corrected pages are enclosed.

We regret any inconvenience this may have caused. If you have any questions regarding this matter, please call me at (301) 415-1479.

Sincerely,

/RA/

William C. Gleaves, Project Manager, Section 2
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-335 and 50-389
