OFFICE OF THE  
SECRETARY  
ADJUTANT GENERAL

I am astonished that the DOE has been paying BNFL to recycle and sell radioactive scrap metal for use in carparks, cookware, medical devices and even childrens' toys! I also understand that your agency is trying to establish standards that would set allowable radioactive levels for recycled radioactive waste. Due to the serious risk to public health from cummulative radiation exposure, I strongly urge you to reconsider setting any standards that are allowable. I certainly don't want my precious grandchildren playing with radioactive toys. Nor do I want to drive a radioactive car, cook in radioactive pots or worry about medical devices giving me cancer. This is truly an insane idea for recycling!

Sincerely,

*Mary Diane Mills*

Mary Diane Mills
