NRC TO HOLD WORKSHOP IN ROCKVILLE, MARYLAND
ON SPENT FUEL STORAGE AND TRANSPORTATION

The Nuclear Regulatory Commission has scheduled a workshop May 17 in Rockville, Maryland, to discuss the agency's regulatory program for storage and transportation of spent fuel from nuclear power plants.

The workshop will be held in the NRC auditorium at 11545 Rockville Pike from 8:30 a.m. to 4:30 p.m. It is open to the public.

During the morning session, the NRC staff will discuss the licensing process and NRC experience with dry cask storage, including licensing and inspection observations and lessons learned. The afternoon will be devoted to industry experience with the dry cask technology, followed by a discussion of NRC staff initiatives in this area and an opportunity for feedback from all workshop participants.

To ensure availability of an adequate number of copies of workshop materials, persons who plan to attend the workshop should contact James Schneider, U.S. Nuclear Regulatory Commission, Mail Stop O-6-F-18, Washington, DC 20555-0001, telephone: 301/415-8523.
