CENTER FOR NUCLEAR WASTE REGULATORY ANALYSES

TRIP REPORT

SUBJECT: Attendance at the Massachusetts Institute of Technology, Sloan School of Management Course—Fundamentals of Finance for the Technical Executive

DATE/PLACE: March 23–24, 2006
Cambridge, Massachusetts

AUTHOR: Patrick Mackin

PERSONS PRESENT:

This course was attended by 75 persons from a variety of public and private institutions and businesses. The final attendance list is attached.

BACKGROUND AND PURPOSE OF TRIP:

The Massachusetts Institute of Technology (MIT) Sloan School of Management is a recognized leader in advanced education for business and finance. The Sloan School of Management presents a series of specialized short courses. The course, Fundamentals of Finance for the Technical Executive, is aimed at persons with a technical background who have been placed in positions that demand a working knowledge of the principles of business finance. My attendance at this course was timely in view of imminent Center for Nuclear Waste Regulatory Analyses (CNWRA) high-level waste contract renewal activities and the need to ensure that financial management for CNWRA is conducted consistent with the Federal Acquisition Regulation.

SUMMARY OF PERTINENT POINTS:

Fundamentals of Finance for the Technical Executive was taught by Dr. Dirk Jenter and Dr. Nittai K. Bergman, both Assistant Professors of Finance for the MIT Sloan School of Management. Dr. Jenter and Dr. Bergman were excellent instructors. Their presentations were clearly linked to the text that was provided as part of the course registration fee, and their joint academic and business experience contributed to a interesting, fast-paced, no-nonsense course. The course agenda is attached.

The course was based on "*Analysis for Financial Management, Eighth Edition*," by Robert C. Higgins, a Marguerite Reimers Professor of Finance. Pre-course study assignments were defined in a course registration letter received several weeks prior to the course convening date. These assignments included reading, problem solving, and writing a brief assessment of a set of financial data. I found the assignments to be particularly useful, and without prior study, I doubt I would have benefitted from the course as extensively as I did.

The course agenda focused on basic finance concepts such as interpretation of financial statements, sustainable growth, and project planning and financing. Activities included lectures, case studies with problems, assessments conducted in randomly assigned groups,

and class discussion of results. Many of the attendees had substantial finance experience, and their insights on approaches to problem solving and analyses were valuable.

A particularly important aspect of the course was the acknowledgment and management of uncertainty in finance. Specifically, sensitivity analysis, scenario analysis, and simulation were identified as valuable tools in financial management. These approaches could be applied to cost-benefit assessments. All course materials and presentations were provided in hard copy form, and I will place these materials in the CNWRA library.

IMPRESSIONS/CONCLUSIONS:

This is an excellent course. I recommend limiting future attendance to those persons who will be dealing with financial management on a daily basis. If others attend, it is likely they would lose familiarity with the material from infrequent use.

The text "*Analysis for Financial Management*" is broad and extremely well written. I am using it for personal study and will place it in the CNWRA library for use by others.

Prior preparation for the course was vital for me. Since I was unfamiliar with some of the course material, I benefitted from several readings of the material identified in the course registration letter.

PROBLEMS ENCOUNTERED:

None.

PENDING ACTIONS:

I will pursue the third recommendation below.

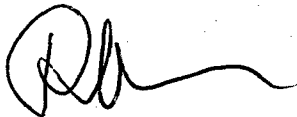

RECOMMENDATIONS:

I recommend this course for U.S. Nuclear Regulatory Commission and CNWRA staff who move from technical positions to positions that have responsibilities for budgeting and planning.

I recommend the course text as a reference and primer for any technical staff member faced with a problem in financial management.

The CNWRA management team and the Finance Group might benefit from routine use of the financial planning and performance information that is readily available from a variety of commercially available software tools identified in the course text.

FUNDAMENTALS OF FINANCE FOR THE TECHNICAL EXECUTIVE
March 23-24, 2006
Hyatt Hotel, Cambridge, Massachusetts

Dirk Jenter, Assistant Professor of Finance, MIT Sloan School of Management
Nittai K. Bergman, Assistant Professor of Finance, MIT Sloan School of Management

Program Agenda

Day 1

- 7:45 a.m. – 8:30 a.m. Registration and Continental Breakfast
Ballroom
- 8:30 a.m. – 12:30 p.m. Introduction and Overview
- Basic Concepts of Finance
- Financial Statement analysis
 - Financial Forecasting
 - Sustainable Growth
- Case Study of Wilson Lumber and In-Class Group Work
- 12:30 p.m. – 1:30 p.m. Luncheon
- 1:30 p.m. – 3:00 p.m. Introduction to Project Evaluation
- Investment Evaluation Methods, Part 1
- 3:00 p.m. – 5:30 p.m. Investment Evaluation Exercise
- Application of Investment Evaluation Methods to Sample Technology Investments
- In-Class Group Work
- 5:30 p.m. – 6:30 p.m. Reception

Day 2

- 8:00 a.m. – 8:30 a.m. Continental Breakfast
Ballroom
- 8:30 a.m. – 10:30 a.m. More on Project Evaluation
- Investment Evaluation Methods, Part 2
- 10:30 a.m. – 12:30 p.m. Project Evaluation
- Diamond Chemicals PLC
- Case Study and In-Class Group Work
- 12:30 p.m. – 1:30 p.m. Luncheon
- 1:30 p.m. – 3:45 p.m. Project Evaluation
- Genzyme/Geltex Pharmaceuticals Joint Venture
- Case Study and In-Class Group Work
- 3:45 p.m. – 4:00 p.m. Wrap-up
- 4:00 p.m. Summary and Adjournment
