## Indian Point Energy Center Status Report

July 26, 2006

### Operational Status

Indian Point Unit 2 is operating at 100% power and has been on line 69 days. Indian Point Unit 3 is also at 100% reactor power and has been on line 5 days.

### Groundwater Investigation – Phase 2A Wells

Entergy has completed drilling on two phase 2A wells located near Unit 1. The phase 2A wells are being installed to help determine groundwater flow paths near Unit 1, which is the source of Sr-90 found in on-site test wells. The picture at right shows the drill rig at MW 53, which is located near Unit 1 opposite the IP2 diesel generators. MW-54, located in the Unit 1 superheater structure has also been drilled. Once the geophysics and other tests are completed the wells will be ready for samples.

### Educational Outreach

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
