SUBJECT: SUMMARY OF FEBRUARY 13, 2007, PUBLIC MEETING REGARDING
DEVELOPMENT OF REGULATORY GUIDE 1.206, "COMBINED
LICENSE APPLICATIONS FOR NUCLEAR POWER PLANTS"

On February 13, 2007, the Nuclear Regulatory Commission (NRC) staff held a public meeting to discuss the status of Regulatory Guide (RG) 1.206, "Combined License Applications for Nuclear Power Plants." The guidance was published in draft form for public comment in September 2006 as DG-1145. The NRC staff explained that public comments were currently being considered and that changes to the RG were being made to address comments, clarify guidance, and ensure consistency with the NRC regulations and the standard review plan (SRP). The staff expects to formally issue RG 1.206 within 60 days of receiving the staff requirements memorandum (SRM) related to the final rulemaking for 10 CFR Part 52. As was done for the SRP, the staff plans to issue most sections of RG 1.206 in March 2007 for preliminary use while making final changes to those RG sections likely to be affected by the SRM and related changes in requirements or rule language.

The staff made available in the NRC's public electronic recordkeeping system, ADAMS, the following preliminary work products:

- Preliminary Work Product to Support February 13, 2007, Public Meeting - RG1.206 Sections A, B, C.I.1 (redline/strikeout) and C.III.1-1 (redline/strikeout), (Accession number ML070390343)

- Preliminary Work Product to Support Feb 13, 2007 Public Meeting - RG 1.206 Section C.IV.2 - Submittal Guidance (Accession Number ML070390473)

The NRC staff and industry representatives discussed the comments and preliminary staff assessments on the above sections. A discussion regarding environmental issues was deferred to a future meeting (tentatively scheduled for April 19, 2007).
