CONDITIONS

10. Licensed material may be used or stored only at the licensee's facilities located at 5 Science Park at Yale, New Haven, Connecticut.
11. Licensed material shall be used by, or under the supervision of, Kenneth F. Blount, Ph.D. and Izabela Puskarz, M.Sc.
12. The Radiation Safety Officer for this license is Izabela Puskarz.
13. The licensee shall not use licensed material in or on human beings.
14. This license does not authorize commercial distribution of licensed material.
15. The licensee shall not use licensed material in field applications where it is released except as provided otherwise by specific condition of this license.
16. The licensee is authorized to hold byproduct material with a physical half-life of less than or equal to 120 days for decay-in-storage before disposal without regard to its radioactivity if the licensee:

- A. Monitors byproduct material at the surface before disposal and determines that its radioactivity cannot be distinguished from the background radiation level with an appropriate radiation detection survey meter set on its most sensitive scale and with no interposed shielding; and
- B. Removes or obliterates all radiation labels, except for radiation labels on materials that are within containers and that will be managed as biomedical waste after they have been released from the licensee; and
- C. Maintains records of the disposal of licensed materials for 3 years. The record must include the date of disposal, the survey instrument used, the background radiation level, the radiation level measured at the surface of each waste container, and the name of the individual who performed the disposal.
17. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
18. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
