U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Subject: Quality Assurance Program Approval for Radioactive Material Packages
License No. 0484, Docket No. 71-0484
Cooper Nuclear Station, Docket 50-298, DPR-46

Reference: Letter from Stewart B. Minahan, Nebraska Public Power District, to U.S. Nuclear
Regulatory Commission, dated May 14, 2007, "Quality Assurance Program
Changes"

Dear Sir or Madam:

The purpose of this letter is to request renewal of Nebraska Public Power District's (NPPD's) License No. 0484, "Quality Assurance Program Approval for Radioactive Material Packages." This license, which is required under 10 CFR Part 71 for packaging and transport of radioactive materials at Cooper Nuclear Station (CNS), was most recently amended by the Nuclear Regulatory Commission (NRC) October 21, 2002, and expires on November 30, 2007.

NPPD has an NRC approved 10 CFR 50 Appendix B "Quality Assurance Program for Operation," which is applied to the applicable portions of radioactive material packaging and transport activities. The latest revision was submitted to the NRC per the reference letter. The provisions of 10 CFR 71.101(f) permit the use of a previously approved 10 CFR 50 Appendix B Quality Assurance Program for Part 71 activities. Accordingly, NPPD requests that the Staff renew approval of the "Quality Assurance Program for Operation" for use in Part 71 activities at CNS.

Should you have any questions concerning this matter, please contact David Van Der Kamp, Acting Licensing Manager, at (402) 825-2904.

Sincerely,

Stewart B. Minahan
Vice President-Nuclear and
Chief Nuclear Officer
