Southern Nuclear Operating Company
Vogtle Early Site Permit Application
Addendum Report for Archaeological Survey of Water Line Corridor for Proposed Intake Structure

Ladies and Gentlemen:

In August 2006, Southern Nuclear submitted an Environmental Report (ER) in support of the Early Site Permit (ESP) application for Plant Vogtle. The ER contained a description of the proposed intake structure including the routing of the intake lines from the intake structure to the plant. The ER indicated that the intake line route was preliminary and subject to change. Subsequent to the ESP Application submittal, the routing did change and the change was reflected in Revision 2 of the ESP Application.

In support of the routing change, SNC conducted a Phase I Archaeological Survey of the area subject to impact by the installation of the intake lines. This survey was initiated subsequent to the submittal of the ESP Revision 2 and has recently been completed. The report was developed as an addendum to the original Archaeological Report submitted with the August 2006 ESP Application.

Please find enclosed the subject addendum report representing the Phase I Archaeological Survey of the revised routing of the Vogtle Unit 3&4 intake lines.

If you have any questions or require additional information, please contact T. C. Moorer at (205) 992-5807.

Mr. J. A. (Buzz) Miller states he is a Senior Vice President of Southern Nuclear Operating Company, is authorized to execute this oath on behalf of Southern Nuclear Operating Company and to the best of his knowledge and belief, the facts set forth in this letter are true.

Respectfully submitted,

SOUTHERN NUCLEAR OPERATING COMPANY

Joseph A. (Buzz) Miller

Sworn to and subscribed before me this 8 day of August, 2007

Notary Public
