

Actions from the June 19, 2007, NEI SMM

- 1) Initiate frequent meetings to resolve aircraft impact issues;
- 2) Start dialog on simulator and operator training for new plants;
- 3) Elevate attention to achieve joint resolution on NEI 06-06 (access authorization issues);
- 4) Inform the NRC within the next week of any new applicants for new reactors or fuel facilities scheduled for FY09;
- 5) Improved process for resolving technical issues in PRA applications and reviews (need more programmatic approach to resolve common PRA issues across different parts of the agency);
- 6) Improve dialog to resolve multiple spurious actuations regarding fire protection;
- 7) Increased discussions on how to improve the transition process and achieve successful completion of on NFPA 805 pilots;
- 8) Work with staff to increase effectiveness of NRC executive team during exercises;
- 9) Setup meeting between IAEA on July 9, 2007, for OSART process;
- 10) Establish effective and expedited review process for the pressurizer weld issue involving nine plants with outages planned in 2008; and
- 11) Coordinate between NEI and NSIR staff re: Part 73 Regulatory Guide priorities.
