Subject: Review of Past Incidents/Operational Releases that exceed NRC release criteria- which could have had had impacts on the environment- Battelle Response for SNM-7 License Activities

Mike, I have reviewed what ready information I have on hand as well as consulted with our past SNM-7 License RSO and Operational HP Supervisor at the WJN Site and have come up with 0 instances of exceeding NRC release criteria and having impacts on the environment. To perform a detailed record review for all of the years the SNM-7 license was in place to perform a detailed assessment of this will take me a week or two.

Thanks,
Joe Jacobsen Battelle BCLDP RSO

Joe

I need you to check and verify for me that there were no incidents or routine operational releases which which would have exceeded the NRC release criteria and had impacts on the environment.

I don't recollect or see any in the records, but want to make sure I am not missing something.

This is part of our and your basis for not doing eany further off-site pathway analysis.

Thanks

Mike

Mike I am passing this onto you as my address with Battelle to send stuff to. This is the e mail I sent to Ellen Poteat with billing a few weeks ago-note she retired... Good for her.
Take Care,
Joe
