You have my ok to knock it to 25 hours. I will deal with Jay. I know he will not be happy if we take it much below that though.

Matt

I think his estimate on the review is too high. Generally, you estimate it at 1 hour review for 50 pages. Technically, his review should be about 10 hours. I don't think we should submit more than 25 hours for the review.

what do you think? I know on the original estimate I submitted his 30 hours, but since the requestor is questioning our estimates, I think this number should come down some.

Let me know how you feel

patti

>>> Matthew Yoder 5/24/2007 10:18 AM >>>  
Patti,

Thanks for the update.

FYI - There is a discrepancy on the hours of review between what we sent previously (and jay re-affirmed below) and the hours listed on your May 22 memo. The memo says 30, when it should be 40.

Thanks,  
Matt

Matt

I received Jay's estimate this morning. His estimate remains the same.

see below

Greetings,

The only item changed for DCI in the scope change is the Exponent Report marked up copies, and I wasn't thinking of sending the whole report in my previous estimates. I am going to stick to my previous estimate at this point. I really want to see a new written statement though for the request.

Search - 30 hours  
Review - 40 hours  
pages - 500

thank  
Patti

Patti,

Jay Collins is out of the office until the 30th. We have sent him an e-mail requesting a revised estimate for the search and review. He may or may not open it before he comes back. Will it be acceptable for us to give you our revision on the 30th? If not we will be guessing at the new numbers.

Thanks,  
Matt
