Moss, TN 38575

Attention; Rulemaking and Adjudications,

I am writing in reference to Energy Solutions
Import License Applications IWO23.

I am in complete opposition to any foreign
nuclear waste being imported into my country
for any reason. We should not allow any nuclear
waste of foreign countries to be brought into
the United States for storage, transfer, reusing,
repackaging, reprocessing, deprocessing, incineration,
destruction, restructuring, research, burial,
reclaiming, recycling, redistribution or disposal.
We should not apply any other term, word
or phrase, to the process of the United States
receiving any nuclear waste from any other
country for any reason, and then approve
any such language into any laws, regulations,
rules, contracts or binding agreements.

Language should be written into our laws,
regulations, rules, contracts or binding agreements,
that not only ban import of foreign nuclear
waste onto our lands, but also from our
waters and airspace.

Come On People! I am having a hard time
believing that you are even considering such a
proposal. Do the right thing Ban the importation
of foreign nuclear waste!

Template = SECY-043

Thank You,
Christa Bean SECY-02
