Cc: Congressman Gordon; Senator Alexander; Senator Corker
Subject: Ban on importation of foreign nuclear waste into the USA from foreign countries
Attachments: image001.jpg; image002.gif

I support any legislation to ban the importation of foreign nuclear waste into the United States from other countries. However, I do not support any language that allows the President to allow importation of foreign nuclear waste under any circumstances. Exceptions should be made only with approval of congress as well as the President. In addition, no other special interest or controversial legislation not pertinent to this ban should be included in this legislation. It is time for earmarking or pork barreling to stop. We the people elected representatives to both the House and the Senate to help the President make decisions and to provide oversight for faulty decisions by the President. Under the current administration, the President arbitrarily makes decisions and many times stands alone (perhaps with his cabinet) against the wishes of Congress and the People. It is time for the elected representatives to make reasonable and logical decisions for the good of this country and for the people who elected them without regard to party or special interest groups. As well the people of the USA cannot continue to support the entire world. The President and the Congress should begin acting as if they work for the People and not for themselves or for corporations.

I have included Senator Corker and Senator Alexander on this email as I want them to be aware of my opinion on this issue and would like to see frequent updates from Senator Corker as I get from Congressman Gordon and now from Senator Alexander.

Thank you for reading.

Gail
