SUBJECT: NUCLEAR FUEL SERVICES, INC., SEPTEMBER 14, 2004, MEETING
SUMMARY RE: INTEGRATED SAFETY ANALYSIS SUMMARY AND
UPCOMING AMENDMENT APPLICATIONS

On September 14, 2004, the Nuclear Regulatory Commission (NRC) staff met with Nuclear Fuel Services, Inc. (NFS) to discuss: 1) plans for submittal and review of the site-wide Integrated Safety Analysis (ISA) Summary; and 2) potential license amendments applications. The NRC and licensee staff in attendance are listed on the attendees list (Attachment 1).

After introductions, NFS presented an outline of their site-wide ISA Summary. They explained that the format of the ISA Summary is similar to the format of the three Blended Low-Enriched Uranium (BLEU) summaries. During the annual update due in January 2005, NFS plans to consolidate the general site descriptions contained in the BLEU summaries, and add it to the applicable section in the site-wide ISA Summary. NFS asked about the expectation on behalf of the NRC for the level of detail in the first annual update, specifically, were we expecting a re-submittal of the ISA Summary. We responded that we expected a list of changes and their justifications, and page changes to the ISA Summary.

The NRC staff discussed the tentative schedule for the review of the ISA Summary. The goals are to complete an acceptance review within 90 days and to complete the review within one year. During that year, the review team is anticipating at least one on-site licensing trip. NFS asked about submitting the ISA Summary on a CD with perhaps one paper copy and the NRC staff agreed to follow-up on the best format for the submittal.

NFS then described several license amendment requests that they plan to submit in the next year. Most of them were administrative changes to the license. One potential submittal would involve [REDACTED] processing line to the BLEU Prep Facility. It is tentatively scheduled to be submitted mid to late 2005.

Following the meeting, NFS committed to continue to keep the NRC informed of the progress of potential licensing actions.

Docket No.: 70-143
License No.: SNM-124

Attachment:

1. Attendees List
2. Hand-outs from the meeting
