DOCKETED  
USNRC

May 28, 2008 (3:45pm)

Secretary  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20556-0001

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

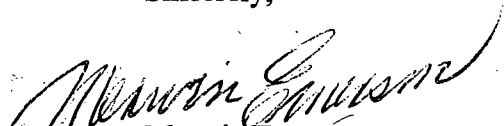

May 20, 2008

Attn: Rulemaking and Adjudication Staff

Letting Italy send their toxic nuclear waste to Tennessee and Utah sets a very dangerous precedent. The next foreign nation may have much, much more toxic waste for Energy-Solutions to accept. For this reason alone, Italy and any other foreign nation should not be allowed to move their nuclear waste into the United States.

If the amount Italy wants to send is so small, then they can figure out how to store it themselves. They were the recipients of the benefits of nuclear energy, now let them handle the negative consequences.

Sincerely,

  
Merwin Emerson

  
Zelda Emerson

Cc: Rep. Jim Matheson
