This draft regulatory guide is temporarily identified by its task number (e.g., DG-5022) and should be referenced as such in all related correspondence. It is important to note that although the NRC makes every effort to make its regulatory guidance available to the public, the enclosed draft guidance has been designated as Official Use Only and must be protected in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR), Section 2.390, "Public Inspections, Exemptions, Request for Withholding."

Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

The NRC's "Regulatory Guide" series was developed to describe and make available to authorized stakeholders such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses. Regulatory guides are not copyrighted and NRC approval is not required to reproduce them. Comments may be accompanied by relevant information or supporting data and should mention the task number in the subject line.
