SUBJECT: VIRTUA HEALTH SYSTEM-WEST JERSEY HOSPITAL, LICENSE
AMENDMENT, CONTROL NO. 142061

Dear Mr. Graf:

This refers to your license amendment request. Enclosed with this letter is the amended license adding the Cancer Center as a location of use for Bexxar treatments. The NRC currently classifies Bexxar treatment as a use permitted by 10 CFR 35.300, in the category "parenteral administration of any beta emitter, or a photon-emitting radionuclide with a photon energy less than 150 keV." Dr. John Wilson's user authorization has been extended to include this category.

As discussed with Dan Januseski, your Radiation Safety Officer, the possession limit in Item 8D of your license has been reduced to 2000 millicuries.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 8:00 p.m. EST, Monday through Friday (except Federal holidays).
