**To:** jtdavis@southernco.com  
**Subject:** Topics for Tomorrow

Jim,

For the meeting tomorrow, the staff would like to hear some discussion on

- how the site-specific SSI analysis was performed (definition of input motion at the site, basis of using 2D model instead of 3D model, use of SASSI computer code, use of the seismic demand obtained to calculate the friction coefficient between mudmat and backfill soil, the stability of the NI against sliding, etc.)
- how the floor response spectra at six key locations were compared

Let me know if you have any questions.

Christian
