Subject: Withdrawal of RAI 5.4-60 S01

Hi Peter,

By letter dated April 25, 2008, we sent you the following request for information(RAI) regarding RAI 5.4-60 Supplement 1:

In a letter dated February 21, 2008, GEH responded to RAI 5.4-60 and stated that the ESBWR reactor water cleanup and shutdown cooling (RWCU/SDC) system would enable operation with water chemistry within the guidelines of both Regulatory Guide 1.56 and BWRVIP-130. Please provide a copy of the BWRVIP-130 water chemistry guidelines in order for the staff to complete its detailed review of materials compatibility with the reactor coolant under SRP Section 5.4.8 (and similarly for reviewing condensate cleanup under SRP Section 10.4.6)

We have determined that we do not need this information from GEH. Therefore, we are withdrawing this RAI and you do not need to respond.

Please contact me at 301-415-3025, if you have any questions.

Chandu Patel, Senior Project Manager
ESBWR/ABWR Project Branch 1
Division of New Reactor Licensing
Office of New Reactors
